

Abhishek Sharma

Full Stack Developer | Node.js | Python | FastAPI | REST APIs | Flutter | React.js | AWS | AI/LLM Integration
Greater Noida, UP | +91-9536626962 | abhisheksharma0265@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience building and shipping production web and mobile applications end to end. Hands-on with **Node.js/Express.js** and **Python/FastAPI** for **REST API** and microservice development, **Flutter** for cross-platform iOS, Android and web apps from a single codebase, and **React.js** for web applications. Experienced with **AWS** (S3, Lambda, Cognito), **Docker** and **CI/CD**. Built backend and mobile systems for a marketplace serving **200K+ users** and **2,000+ restaurant partners**, built an **AI chatbot service using Python, FastAPI and the Anthropic Claude API**, and integrated **Square and Clover POS systems** that reduced partner operational effort by nearly **90%** and improved API response times by **40%**. Strong problem-solving and communication skills, with experience working directly with clients and cross-functional teams.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, Dart, SQL

Backend: Node.js, Express.js, FastAPI, REST APIs, Microservices, JWT Authentication, RBAC, Webhooks, Background Jobs, Async Processing

Frontend & Mobile: Flutter, Dart, Cross-Platform Mobile (iOS / Android / Web), State Management, React.js, Redux, React Hooks, Responsive Design, HTML5, CSS3

AI & LLM: Anthropic Claude API, LLM API Integration, AI Chatbot Development, Prompt Engineering, Structured Outputs, Model Context Protocol (MCP), Retrieval-Augmented Generation (RAG), AI Coding Tools (Claude Code, GitHub Copilot)

Databases & Cloud: PostgreSQL, MongoDB, Query Optimization, Indexing, Data Modeling, AWS (S3, Lambda, Cognito), Serverless, Docker, CI/CD, Git, GitHub Actions

Integrations & Tools: Square POS, Clover POS, Stripe, Customer.io, Firebase Cloud Messaging, PostHog, Postman, Jira, TestRail, Agile / Scrum

PROFESSIONAL EXPERIENCE

Software Engineer

July 2023 – Present

XORLABS

Greater Noida, IN

- Develop production features end to end across **Node.js/Express.js**, **Python/FastAPI**, **Flutter** and **React.js** for clients in the food-marketplace, healthcare and developer-tooling domains.
- Handle backend services, cross-platform mobile apps and third-party integrations from requirement analysis through release and production support.
- Package services with **Docker** and run releases through **CI/CD** pipelines, keeping builds automated and environments consistent.
- Use **AI coding tools (Claude Code, GitHub Copilot)** in day-to-day development to build features faster and speed up refactoring and debugging.
- Work directly with clients on requirement gathering, scoping, demos and release planning, collaborating with cross-functional teams in Agile/Scrum.

Junior Software Engineer

July 2022 – June 2023

XORLABS

Greater Noida, IN

- Contributed to enterprise developer-tooling products, working on **parsing components** and **SQL** data layers within an established codebase.
- Authored and validated test cases across multi-language codebases and tracked defects in **TestRail**, improving release quality.

CLIENT PROJECTS

GoodieBag | *Surplus Food Marketplace — iOS, Android & Web*

2023 – Present

Node.js, Express.js, Flutter, Dart, Python, FastAPI, Claude API, PostgreSQL, AWS (S3, Lambda, Cognito), Stripe, Firebase, Customer.io, Docker

- Built and maintained the core **Node.js/Express.js** backend for a marketplace serving **200K+ users**, with **REST APIs** for authentication, catalog, ordering and partner management.
- Improved API response time by **40%** by optimizing **PostgreSQL** queries and adding targeted indexes for high-concurrency load.
- Integrated **Square and Clover POS systems** so **2,000+ restaurant partners** manage locations, catalog, inventory and orders from their existing POS, reducing partner operational effort by nearly **90%** and driving new partner acquisition.
- Built **webhook-based** catalog and inventory sync to keep data consistent across POS systems, backend and storefront in real time.
- Built an **AI chatbot service in Python and FastAPI** using the **Anthropic Claude API**, integrated with the Node.js backend and the Flutter app to handle customer and partner queries.
- Developed the full **Flutter** app across **3 platforms** (iOS, Android and web) from a single codebase, covering reusable widgets, state management and the complete flow from store discovery to order tracking.
- Integrated **Stripe** for payments and partner payouts, including checkout, payment webhooks, refunds and failure handling.
- Wrote **AWS Lambda** functions in **Python and Node.js** for file handling and background jobs, using **S3** for media storage and **Cognito** for authentication.
- Added **PostHog** analytics and set up push notifications with **Firebase Cloud Messaging** and lifecycle campaigns with **Customer.io**.
- Improved API reliability with validation middleware, structured error handling and **JWT authentication** across services.

Avery Telehealth | *Enterprise Telehealth & Patient Management Platform*

2023

React.js, Redux, Node.js, Express.js, REST APIs, MongoDB, AWS

- Built responsive **React.js** portals for providers and patients with reusable components, Redux state management and **role-based access control**.
- Worked with secure **REST APIs** for clinical workflows including patient records, appointment scheduling and provider management.
- Added form validation, error handling and logging to meet healthcare data handling requirements.

Code Analyzer | *Static Code Analysis SaaS Platform*

2022 – 2023

Java, Parsers, Abstract Syntax Trees (AST), Rule Engine, SQL, Git

- Worked on a **SaaS static code analysis platform** supporting **30+ programming languages**, focusing on the **parser** and **Abstract Syntax Tree (AST)** layer behind the detection engine.
- Extended language grammar and AST handling to support newer language constructs, increasing rule coverage.
- Fixed false-positive detections through AST traversal and pattern-matching changes, improving analysis reliability for enterprise customers.

CERTIFICATIONS

- **Building with the Claude API** — Claude Academy, 2026 | [Verify](#)
- **Claude Code in Action** — Claude Academy, 2026 | [Verify](#)
- **Introduction to Model Context Protocol** — Claude Academy, 2026 | [Verify](#)

EDUCATION

RD Engineering College, Ghaziabad

2019 – 2023

B.Tech, Computer Science & Engineering | CGPA: 8.86 / 10

ACHIEVEMENTS

- **Star Performer Award** — four consecutive years (2022–23 to 2025–26) for consistent delivery and technical contribution.
- **All India Rank 79** in Codekaze 2022, a national competitive coding contest.
